

SCHOOL CHILDREN TO ENTER CONTEST

City Beautiful Campaign
Will Include Both
Young and Old.

BETTER ENTER NOW

Entries Close April 18;
Costs Nothing; Prizes
Total \$400.

The city beautiful contest committee has arranged many new and novel ways of making the contest universal and many more entries are expected before April 18, the last day on which they will be accepted. A series of seven slides is being shown at the different theaters, which makes it impossible for anyone to attend the theaters without becoming aware that Tulsa intends to be the most beautiful city in the country.

An order has been given for one thousand special entry blanks, which will be distributed among the school children and E. E. Oberholzer, superintendent of city schools, is encouraging all the pupils to enter. The Chamber of Commerce has arranged an attractive file system, which distinguishes by color and number the class of the different contestants.

"Before and After." A photograph will be taken of the premises of all those who desire it, before and after the contest, showing the work accomplished during the

summer, and this fall a number of these will be printed, demonstrating the work accomplished through the contest.

There remains only twelve more days before the list is closed and everyone desiring information should call E. O. Tibbels at the Chamber of Commerce or fill in the entry blank and mail it to him now, as every effort will be made to assist each contestant.

Four hundred dollars in prizes will be awarded to the winners. It costs nothing to enter. No one is barred.

VOTE ON ROAD WORK AT FAIR.

County Commissioners Call Meeting to Submit Proposition.

Special to The World.

BRISTOW, Okla., April 6.—The board of county commissioners has called an election for Earl township, for May 1, to submit the proposition of voting \$25,000 for road building and improvement purposes.

Coincident with the issuance of the call an Oklahoma City bond-buying firm announced that it would pay for and accept interest on the bonds and also the expense of the printing and issuance of the bonds.

A road building revival is in progress all over Jefferson county and both town and country people in this part of the county are enthusiastic over this proposed issue.

WILL SELECT SITE FOR 1916 FAIR.

President of Creek County Fair Association Calls Meeting April 15.

Special to The World.

BRISTOW, Okla., April 5.—John P. Egan, of Sapulpa, president of the Creek county fair association, has issued a notice to the different towns in the county that a meeting will be held April 15 for the purpose of selecting a place for the fair of 1916. It is thought that the business men of Bristow will make an effort to get the fair here for this season, and if the county fair is not held here there will be at least four townships that will hold their meeting at this place.

Thin Men and Women Who Want to Gain Weight Should Try At Once This 10 Days Flesh Building Test

Report Gains At Rate Of Three To Five
Pounds A Week In Many Instances.
Full Directions Given.

Most thin, ravenous men and women would probably be glad to increase their weight with ten to twenty-five pounds of good, firm solid healthy flesh and fat if they believed it possible to accomplish such result by merely making the flesh building materials in their daily meals do a little more work than they are doing now.

This is said to be the chief reason why most thin people do stay underweight. They are so constituted that they fail to fully assimilate the nourishment of their food, a great deal of which passes from the body as waste. Increase assimilation to normal and normal weight follows as a matter of course. If you are ten pounds or more underweight and believe this can't be done in your case, here is a simple inexpensive and really harmless test that is well worth trying.

First weigh yourself. Then with each meal for ten days and each night as you go to bed take a single Sargol tablet. Then weigh yourself again and let the scales tell the story.

Sargol may not increase your weight as much as one pound a day but with whatever increase in your weight may be shown you can decide what its continued use for a few

weeks further may be able to do for you. Sargol does not itself make fat but consists of a splendidly balanced combination of assimilative aids and flesh-building agents. It mixes with your meals for the purpose of making it easier for your blood to accept their strength, flesh and fat-making nourishment and turn it into strength, flesh and fat upon your body.

A great many people have gladly told that it succeeds. "I have increased 18 pounds in less than a month," wrote a man from Colorado. Another man who said he had been losing over a pound a week and was under 125 pounds, gained two pounds the first week taking Sargol and "been gaining ever since." Last report over 170 pounds. Better than 15 pound gain. A lady from St. Louis wrote, "Have gained 16 pounds and am still gaining." Sargol as a rule should be taken 30 days or more where results like above are desired.

The tablets are small, easily swallowed, produce no disagreeable effects, contain no habit drugs, are harmless and not at all expensive as compared with results said to be obtained.

SOTT—Sargol, referred to above is well known as a flesh builder to the retail drug store as well as many other of the leading local druggists who furthermore sell it on the positive guarantee, as found in each large package, of satisfactory weight increase or money back. In view of this liberal offer and the harmless nature of the remedy, it would seem that all who desire increased weight should be glad to give this method a trial.—Adv.

In the Oil Fields

"GAS" UP IN CALIFORNIA.

SAN FRANCISCO, April 6.—The price of gasoline took its fifth jump in five months when the Standard Oil company of California announced that beginning today the price of the product would be advanced 1 cent, or to 19 cents a gallon. A year ago gasoline sold here for 12 cents a gallon.

AT MUSKOGEE.

Ransom and others are drilling at 2,000 feet on the northwest of section 13-15-17.

AT CANADIAN.

It is reported that the Shadwell Oil company will abandon its No. 2 in section 20-7-17 with a bad fishing job at about 2,000 feet.

AT KINTA.

McCaman and others have a rig up for a test in the southeast of section 25-7-9.

AT ELFAULA.

The Southern Oil company is drilling again at about 1,600 feet in section 18-10-16, where they have been shut down for some time.

AT AUGUSTA.

The Mid-Kansas Oil company's No. 2 in 3-28-4 is drilling at 2,000 feet with no showing yet and looks like a dry hole.

The Wichita Natural Gas company had a small showing of gas at about 1,300 feet in its test in 25-27-8.

MINTOSH COUNTY.

The Caney River Gas company and the Gypsy Oil company have a rig up for a test in 21-11-17.

NORTHWEST OF HENRYETTA.

McMahan and others' No. 1 on the James Harjo farm in 23-12-11 is dry and abandoned below 2,500 feet.

AT MAUDE.

The Maude Oil & Gas Co.'s test in section 18-7-5 has drilled a couple of feet into the second sand, after getting a break and, according to the best reports, the production has been helped slightly.

WEST OF COWETA.

B. G. Goble is drilling at about 1,500 feet in his test in section 14-17-14.

SOLD GAS PROPERTIES.

A. L. Derby, well known oil operator, has sold his gas properties and his franchise for the city of Winfield to the Wichita Natural Gas company, for a consideration said to be \$40,000.

Home Helps.

"She froze him with a glance." The man read this aloud from a novel.

"Try that on the ice cream, my dear," he suggested.

Cuticura Soothes Itching Scalps

Prevents Dandruff and Falling Hair

On retiring touch spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. This treatment does much to keep the scalp clean and healthy and to promote hair growth.

Sample Each Free by Mail

Write 25¢ book on the skin. Address post-card: "Cuticura, Dept. 24G, Boston." Sold everywhere.

How's Your Complexion?

To keep the skin soft and attractive, use—

Nyal Face Cream

25c and 50c jars. Sold only at Nyal Quality Drug Stores

Every Now and Then

—I run across the man who "doesn't believe in advertising"—one who says "advertised goods cost more."

As a general rule—while he says that he at least is not influenced by advertising—he has on an advertised collar and advertised shoes; he shaves with advertised soap and an advertised razor. He reads advertised books—and goes to an advertised theatre. And if he smokes—it's an advertised tobacco.

Every time I meet him—I'm genuinely sorry for him, as I am sorry for the man who doesn't believe in telephones. (For such men still exist.)

The big economic problem of the world is now, as it always has been—

"How can each of us get the most from his day's work?"

Measured in gold, wages may be lower or higher than they used to be.

Measured in things to eat and things to wear; in books to read and music to hear; measured in comfort or convenience—in shoes to walk in or automobiles to ride in—everyone of us gets infinitely more for his day's work than anyone a hundred years ago.

And so, more in proportion than last year, or last month—or, indeed—than yesterday.

This century has made more difference, in the physical things of life, than any other single century ever made. For this century saw the beginnings of steam and electricity. Steam meant quicker transportation of goods—electricity quicker transportation of ideas.

If it hadn't been for great and wide distribution, the great factories—which have made good things cheap and

cheap things better—could never have existed.

If it had not been for the railroads—great and wide distribution could not have existed.

If it were not for the advertisements that take to millions of people the news of what the great factories are producing—the factories could not exist.

If it were not for advertising, you might be paying \$2 for something that was better made a hundred miles away for \$1.

And—if it were not for advertising, you would be living today without even knowing of the existence of most of the things that are now necessary to your comfort. The sewing machine costs money—but cheapens shirts. The printing press costs money—but cheapens books.

The telephone costs millions—and saves tens of millions. Advertising costs money—and not only lowers selling costs, but, by increasing the field of competition, lowers prices too.

And advertising does a finer thing than all of these. For it stirs in men the desire for better goods—for better homes—and so—for finer lives. It is the one biggest, broadest, single economic influence for good in the world today.

So—when, now and then, I meet the man "who doesn't believe in advertising" I am glad. For I am apt to tell him some of the reasons that I think him wrong. Which is a pretty good way to burnish up and strengthen my own faith.

[Write the A. A. C. of W., Indianapolis, for booklet, written for buyers like yourself. Every man or woman who buys any kind of commodities will find it profitable reading.]

-test the woolens this way

Every fabric we offer you in our tailored to measure clothes has been rigidly tested to make certain it is all wool—so rigidly tested that we're sure of it—we'll tell you a simple little test to demonstrate to your own satisfaction:

Tear a thread out of the cloth—expose the end of it to a burning match—rub the charred thread between the palms of your hands—then blow.

Every bit of the charred thread will fly away—proving that the thread is all wool. If there were any vegetable matter in it (cotton), it would cling to your hands.

Gasoline to \$18 a Barrel

This is the age of oil. Gasoline at 36 cents per gallon, or \$18.00 per barrel, is the cheapest power producer in the United States. It will soon reach that price, if not higher. The independent oil producer has been a martyr. Big banks have refused him credit. He has been discriminated against by unfair legislation and unjust taxes. He has been laughed at by high-brow reformers who have sneered at the oil business as of no consequence. The public is now waiting up to the very importance of the concern that drills oil wells.

The greatest opportunities in America are in the Kansas, Oklahoma and Texas oil fields today. The Uncle Sam Oil Company is the pioneer independent. It has fought its way through opposition to prosperity.

It now controls over 20,000 acres of oil and gas lands and leases in the real oil belt. Has over 120 producing wells. The percentage of its property is controlled by its own pipe line now in operation for over 105 miles.

It has worked under headway on Eighteen (18) wells at this hour. It has seven different properties that by just a little good luck in its drilling operations should produce more oil than all its stock will total at the sacrifice price offered you.

We are determined to start the balance of forty drills. About twelve per cent of the stock is unissued. Stock has been allotted among the present eighteen thousand stockholders on a stock dividend basis. The loyal stockholders own their stock at about four mills per share. Under this sacrifice offer you can secure the stock at six mills per share. Our authorized issue is Four Hundred Million shares. That only means when all is issued a real capitalization basis of two million four hundred thousand dollars.

We know the speculative value of this stock should be several times this amount, but we have many leases where the drilling of one test well may jump in value ten to one hundred times. We need new capital, and we are going to raise it forthwith. This notice will reach Twenty Million readers. This is the only real independent company in the Middle West. Big bankers are bullied

by the Oil Trust crowd. They will extend no credit to a real independent. Therefore when we want new capital we go direct to the American people through the independent press.

There can be about three hundred thousand oil wells maintained in Kansas and Oklahoma that will produce after the first two years from three-fourths of a barrel to four barrels per day. To conserve this vast production of high grade oil, prices must soon reach and stay between \$2.50 and \$3.00 per barrel.

It is the purpose of The Uncle Sam Oil Company to enlarge its holdings until sufficient territory is secured to supply our refineries for years to come. Deeper drilling on such vast holdings may open deeper reservoirs of rich production and make enormous profits on this stock at present prices.

You better buy into a real oil company on a ground floor basis—that has the property in sight. Come and go over our properties and you will admit that we have several properties that by development should produce more than all stock when issued will come to at this price offered you herein.

In the Red Fork district, within three miles of one of our refineries, the Company has about fourteen hundred acres of leases. Twelve days ago it drilled one well that started off natural at two hundred fifty barrels per day. Last week it got a bigger well. It is now producing 300 barrels per day. It has produced more high grade oil gushers than any other district in the world—The Uncle Sam Oil Company controls nearly four thousand acres and has twelve deep wells under headway.

Southwest of the great Healdton oil field on a reported greater anticline than Healdton, this company has secured control of nearly ten thousand acres, and desires to commence a deep test forthwith.

We expect to sell all this stock by April 15.

If you will heed the truth when you read it, get into this Company on a big basis. Remember this is an independent company. For ten years The Uncle Sam Oil Company has been the thorn in the side of the Trust. Fake reformers, high-brow

schemers and inspired newspapers, have all made their assaults in the Oil Monopoly conspiracy against us. But gasoline in Kansas City—the home headquarters of The Uncle Sam Oil Company for seven years—is now 18 cents per gallon against 24 to 30 cents in other places where freight rates are the same, but no Uncle Sam competition. The Uncle Sam Oil Company is requesting the Washington authorities to validate its Oaseg lease of 450,000 acres with a provision written in the lease authorizing state utility or corporation commissioners to fix the price of oil and oil products from this great government controlled lease to the people. The federal government at one lick can validate that Uncle Sam lease on this basis and force the same provision in all government leases and end oil monopoly.

If you are a red-blooded American and wish to aid a righteous cause and at the same time make big profits, take down your check book and join our independent army, now eighteen thousand strong, and help build this great independent until its Red-White and Blue tank wagons and auto trucks will deliver Uncle Sam Oil in every principal trade center in the United States.

As part of the consideration the Company reserves the right to approve or reject any subscription to, or transfer of its stock. The stock is non-assessable. Subject to prior sale, results will be accepted on the following basis until April 15:

SACRIFICE OFFER.	
2,500 Shares	\$ 15.00
5,000 Shares	30.00
10,000 Shares	60.00
100,000 Shares	600.00
250,000 Shares	1,500.00

Put an X opposite the stock you want and make all remittances payable to The Uncle Sam Oil Company, by check draft or money order.

Write your name and address plainly.

(Name.)

(Street, City and State Address.)

Respectfully submitted,

THE UNCLE SAM OIL CO.

H. H. TUCKER JR., President.

(Address all letters to the Company.)

KANSAS CITY, KANSAS

appear to have solved various engineering problems that prove their ingenuity and technical skill in lines of endeavor in which we Americans are at present intensely interested. If the Martians have learned how to build

canals without inviting landslides, have made of irrigation processes an exact science, and have, as various authorities contend, learned how to fly by their own motive power, there are numberless specialists in this

country who would be pleased to call them up by long distance at once. It is to be hoped that M. Guzman of Paris will revise his opinion of Mars as too easy a mark for wireless genius.—N. Y. Sun.
